

# 6<sup>th</sup> Europe Region Physiotherapy Congress

5-6 November 2026

## Guidelines: Poster session

Please read this information carefully to prepare properly for your presentation at the  
6th Europe Region Physiotherapy Congress

---

### Poster format

Your poster must:

- Be prepared as **one single sheet**.
- Be in **A0 size: 84.1 cm wide × 118.9 cm high**.
- Use **portrait (vertical) orientation**.
- Be written **in English**.
- Black text on a white background is easiest to read.
- Text tends to look better when left-aligned rather than fully justified.
- Leave enough space around the text and avoid overcrowding your poster.
- Images, graphs, diagrams and logos can be included to make your poster clearer and more visually appealing.
- Be **printed in advance and brought to the Congress by the presenting author**.

Please place the **title, authors and affiliations at the top of the poster exactly as submitted** and make sure that all text and visuals are clear and legible from a normal viewing distance. The reference document recommends ensuring legibility from at least 2 metres.

An **official Congress Poster template is available**. You may use the official Congress poster template or your own institutional template.

We encourage you to include the **Congress logo** or the wording: **“Presented at the 6th Europe Region Physiotherapy Congress”**.

### Poster display

Printed posters will be displayed on poster panels located in the **Main Hall of the Palacio Municipal de Congresos de Madrid**.

Each poster will be assigned a specific **ID Code**. Authors must place their poster only on the panel corresponding to their assigned number, following the information provided by the

Technical Secretariat. This follows the same panel-identification system used in the reference guidelines.

**Authors are responsible for bringing their printed poster to the Congress and placing it on the assigned panel.**

The Congress organisation will provide the necessary material to attach posters to the panels.

Please do not use any fixing material that could damage the poster boards.

### During the poster session

Presenting authors should be available next to their poster during their **scheduled poster session** to discuss their work and answer questions from participants.

We strongly encourage authors to use this opportunity to engage with colleagues and other Congress attendees.

Information regarding your **ID Code, display times and poster session schedule** will be communicated by the Technical Secretariat.

### Removal of posters

Authors are responsible for removing their poster at the end of the corresponding display period.

The Congress organisation cannot be held responsible for posters that are not collected after the scheduled removal time.

### Contact details

We recommend including your **name, institution and contact details** on the poster so that participants can contact you regarding your work.

Congress hashtag: **#ERPhysioCongress2026**  
World Physiotherapy community: **#GlobalPT**

For any questions regarding your poster presentation, please contact the **Congress Technical Secretariat (physiocongress@alocongress.com)**.

We look forward to welcoming you to the **6th Europe Region Physiotherapy Congress**.
